

ORIENTEERING
C A N A D A

Vacancies Within the Canadian National Orienteering Team!

Over the last few seasons, the High Performance Program (HPP) has made some big strides as a result of the hard work of the athletes and initiatives by the High Performance Committee (HPC). Some examples of these initiatives are fundraising events, the Canada Cup Elite Series, and arena organization at major events. These types of initiatives have not only contributed to a better racing and training environment for Canada's best orienteers, but have also created an enhanced vibrancy in the entire Canadian orienteering community, and in particular has given younger athletes a growing number of role models and reasons to be excited about the sport.

As the HPP continues to look forward, one of the most important steps is to provide better support for our national athletes at major international competitions, and therefore we are looking to fill following roles:

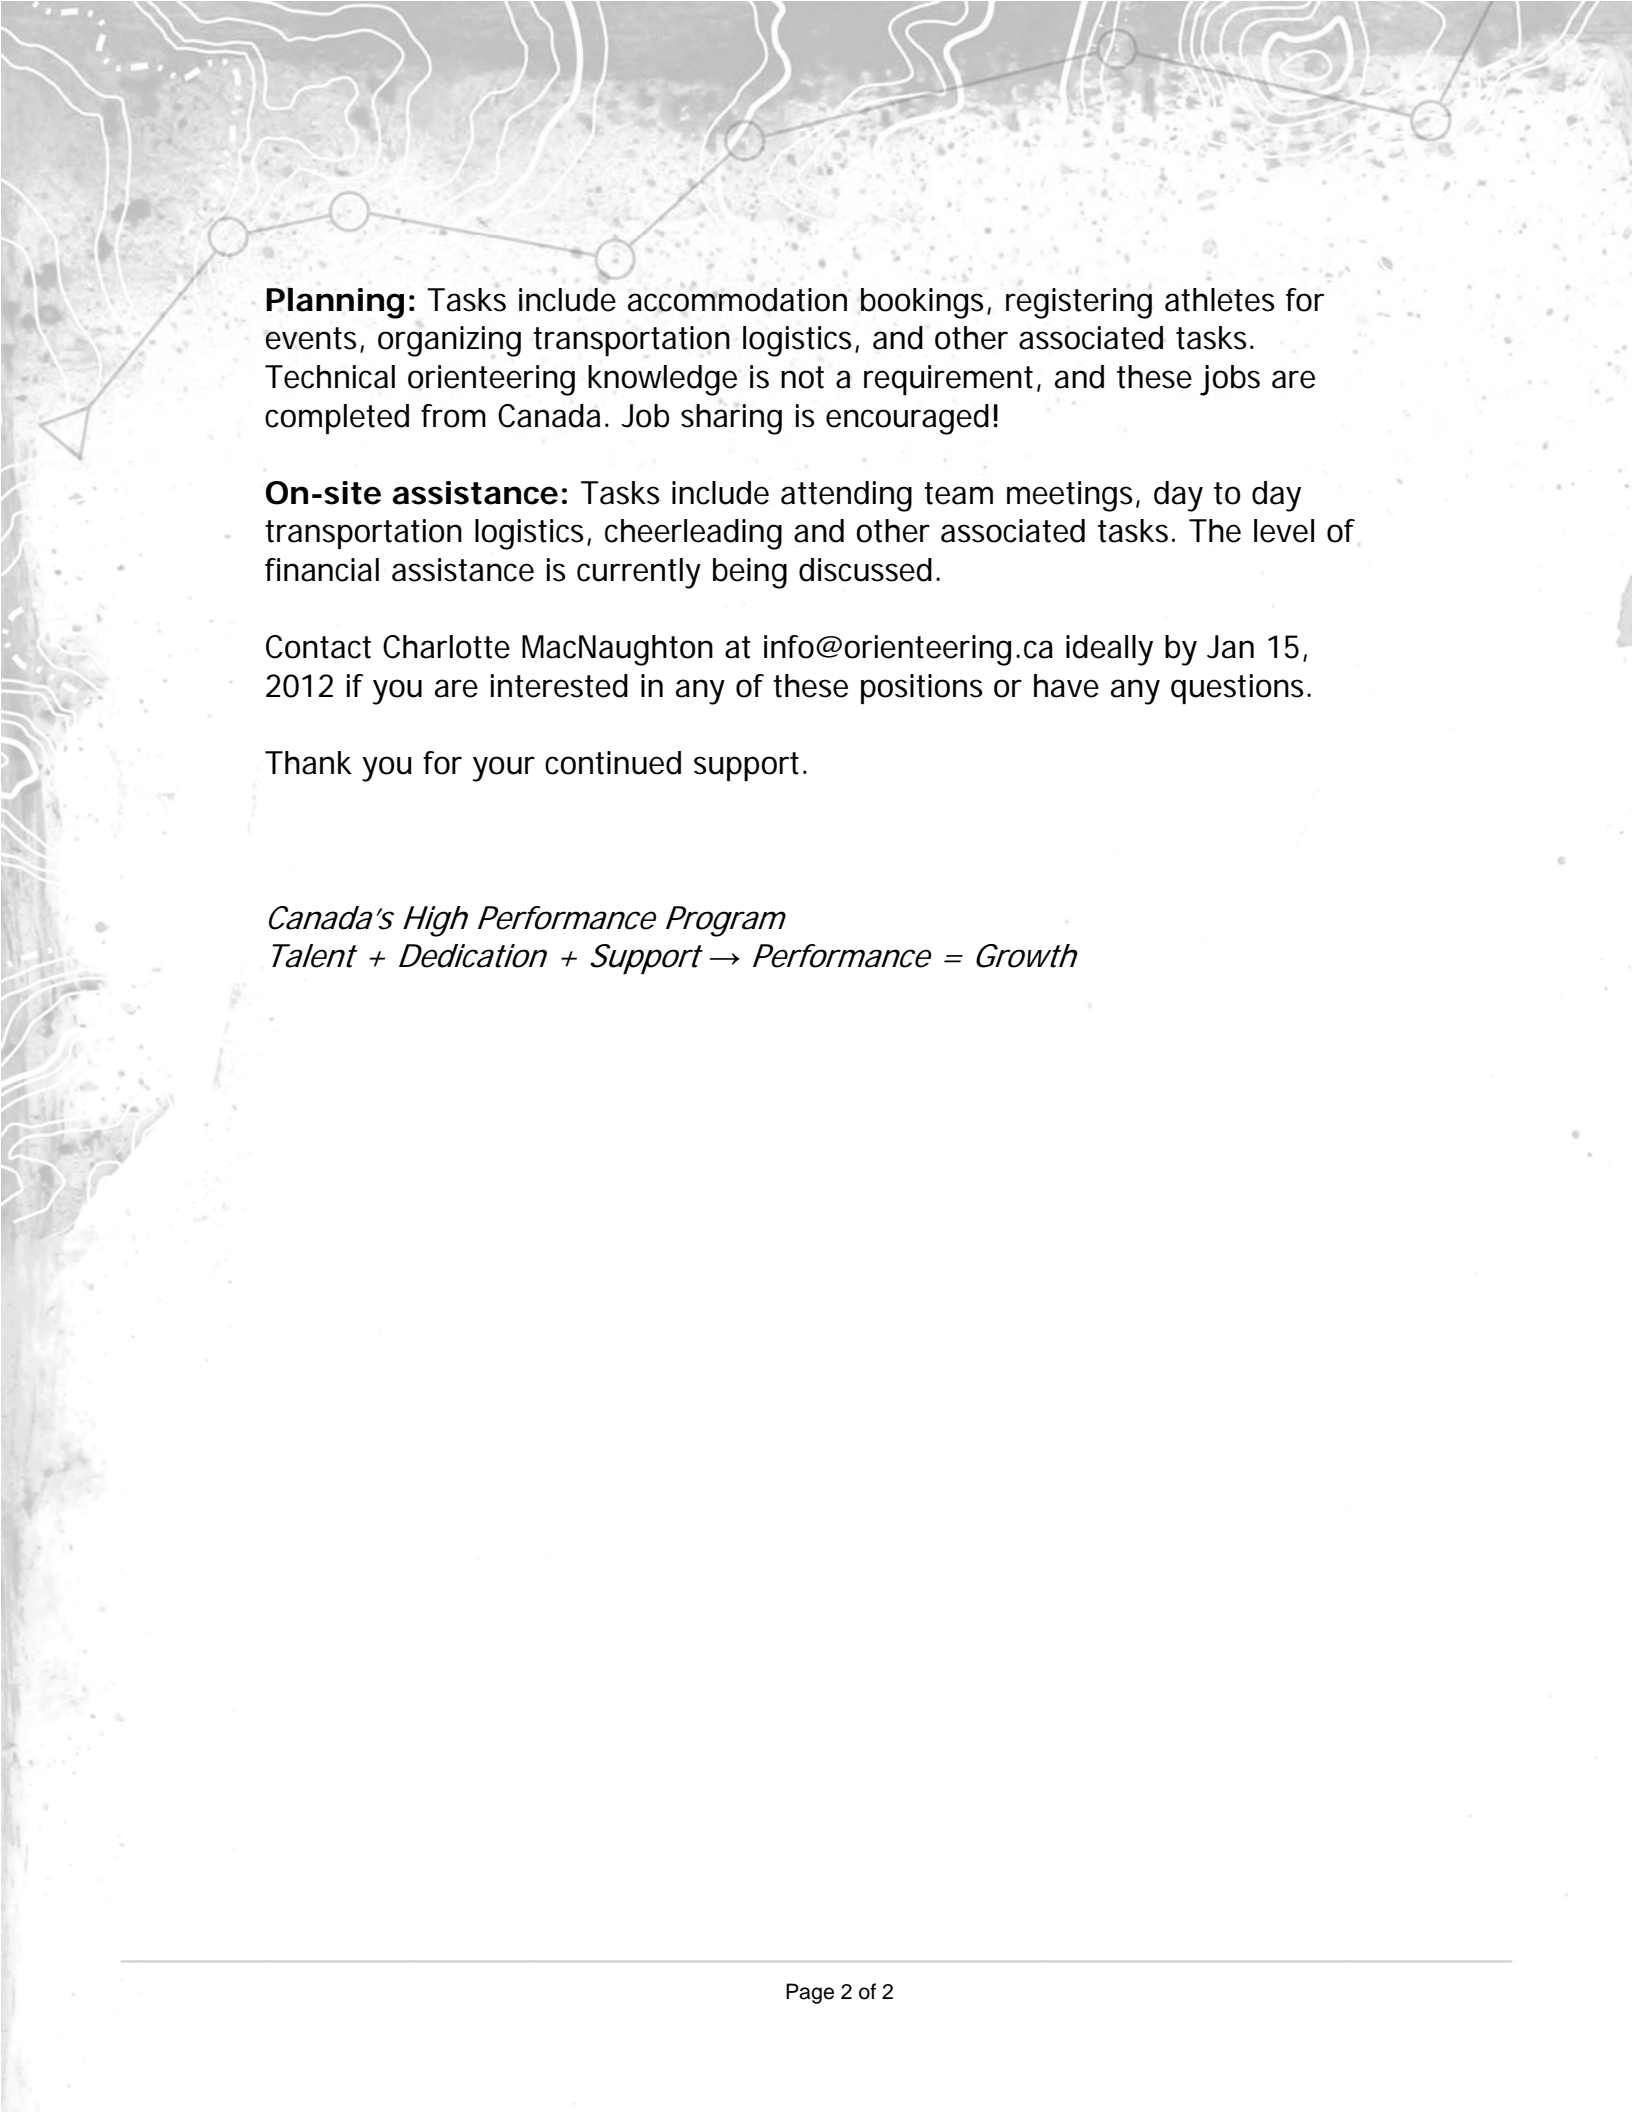

Team Coach - World University Orienteering Championships Team

June 26 - July 6 in Alicante, Spain

[WUOC](#) is an outstanding, high caliber international event, which provides valuable experience and great motivation for young senior athletes who have not made it onto the WOC team yet. As orienteering is a late specialization sport, support and opportunities for young seniors is critical to helping them make the jump from junior to senior ranks. Therefore, the High Performance Committee wants to place a greater emphasis on the WUOC. Ideally, the Team Coach would be able to work with the athletes throughout the training season, in the buildup to the event, and provide support at the event itself. The level of financial assistance is currently being discussed.

Admin Team for 2012 WOC, JWOC, and WUOC championships

As the HPP grows and our international results improve, the HPC sees the need to establish an official Administration Team. The members of the Admin Team will play a critical role in our support network, and will be an integral part of the High Performance Program. We are looking for a number of individuals to assist with the following:

Planning: Tasks include accommodation bookings, registering athletes for events, organizing transportation logistics, and other associated tasks. Technical orienteering knowledge is not a requirement, and these jobs are completed from Canada. Job sharing is encouraged!

On-site assistance: Tasks include attending team meetings, day to day transportation logistics, cheerleading and other associated tasks. The level of financial assistance is currently being discussed.

Contact Charlotte MacNaughton at info@orienteering.ca ideally by Jan 15, 2012 if you are interested in any of these positions or have any questions.

Thank you for your continued support.
