

## Committee Report to 2021 AGM

Committee Name	<b>Mapping Committee</b>
Committee Chair	Stefan Bergstrom
Committee Members	Don Bayly, Christian Pillar
Report Date	2021-07-09
Submitted By	Stefan Bergstrom

### The Past Year

The committee has been dormant with no activity in the past year due to the COVID pandemic.

Due to pandemic restrictions, hiring of foreign or even out of province mappers was practically impossible. Only local mapping was possible.

### Looking Forward

New software development and access to LIDAR, satellite and aerial imaging, and better GPS equipment makes the mapping process easier. We need to educate our mappers and train new mappers on the available tools.

Access to land for orienteering is becoming harder due to environmental concerns about species at risk on public land, and private landowners not wanting people on their land. Documentation and best practices to work with landowners, both public and private, is needed to educate about orienteering and its benefits.

The committee is looking for additional members.
